

Press Release

Southport, UK – 7<sup>th</sup> September 2017

Ear Buddy

## Ear Buddy

The perfect headphone companion

### Say Goodbye to Hiss and Pop!

The Ear Buddy is the friendly-fix for headphones.

Based on the original iFi audio iEMatch, the **Ear Buddy** has been created for any headphone user who enjoys clear, clean music without annoying audio gremlins getting in the way.

### Simple but Effective

The **Ear Buddy** is a simple plug and play device that reduces aggravating hisses and pops and the sudden blasts of irritating loud noise that spoil enjoyment. And without complicated settings, it can be used and appreciated by anyone who loves to listen to good music on the move.

### Perfect for

- Smartphones
- Computers
- A/V systems
- In-flight systems

## Travel Accessories

- Gold-plated airplane adapter
- Soft-foam contoured earplug (-37dB)
- Fabric travel pouch

## Specifications

- High sensitivity (-15dB) attenuation
- 6N Copper matrix signal cabling
- Gold-plated circuit board with premium components (eg MELF resistors)
- Gold-plated 3.5mm male/female connectors
- Input impedance > 16 Ohm
- Output impedance > 1.5 Ohms

The retail price of the **Ear Buddy** is **US\$20 (ex-tax) or €24 /£20 (incl. VAT)**

Ends.

### About iFi

iFi audio is headquartered in Southport, UK. It is the sister brand of Abbingdon Music Research (AMR). They respectively design and manufacture portable and desktop 'ultra-fidelity' audio products and high-end audio 'home-based' components. The combined in-house hardware and software development team enables iFi audio and AMR to bring to market advanced audio products.
